CONTENTS

Commentary

1 AI in Chemistry: A Data-Driven Framework for Managing Domino Effects
Xiezhi Yu, *Naichi Zhang*, *Shouying Li*, *Hang Gao*, *Xiaoyan Tang*, *Huan Zhong*, *Xiliang Yan and Chengjun Li*

6 Data Security and Data Governance: From Siloed Implementation to Integrated Assurance
Ruilin Sun, *Guangliang Zhang*, *Xian Zhao*, *Jun Zhang*, *QingHua Cui*, *Zhenchang Wang and Han Lv*

Research Article

8 A Review of Automatic Identification and Extraction of Innovation Points in Academic Papers: Progress and Paradigm Shifts
Xinyu Song, *Sanhong Deng and Duxin Shang*

28 A Multi-Method Field–Topic–Technology (FTT) Approach with Dual-Path Integration for Identifying Key Core Technologies
Chao Tang, *Yan Qi*, *Haiyun Xu*, *Shuying Li*, *Zenghui Yue and Robin Haunschild*

53 Unlocking Medical Big Data: Overcoming the Interoperability Challenge in Healthcare Systems with Blockchain
Moting Su, *Xiangli Xiao*, *Ruoyu Zhao and Ye Zhu*

75 From Human-Guided to Generative Knowledge Discovery: A Reflexive Human-AI Ecology Framework for the Age of Generative AI
Tipawan Silwattananusarn and Pachisa Kulkanjanapiban

93 Bibliometric Analysis of Literature on Inverse Problems in Geophysics Using CiteSpace
Jiajia Liu, *Hanyue Sun and Robin Haunschild*

118 A Joint Multi-Task Learning Framework for Citation Intent and Citation Evaluation Classification
Yang Zhao and Guangyin Zhang

131 Critical Thinking Patterns and Their Associations with Creative Performance in Human-AI Co-Creation
Jing Chen and Youjin Shi

150 Diffusion and Citation Impact of Data-Driven Research in U.S. Higher Education: A Text Mining and Machine Learning Approach
Arielle J. King and Sayed A. Mostafa

166 Semantic Integrity over Scale: A Complete-Semantic Framework for Measuring Corporate Digital Transformation
Xianhui Fan, *Zongwei Li*, *Yanhui Zhang and Zhenyu Li*

185 Research on Topic Identification and Evolution in Minimally Invasive Surgery Based on LDA and DTM Models
Qian Zhou, *Boning Zhang*, *Xinyu Chen*, *Shuining Li*, *Shiqing Liu*, *Jiaxin Ye*, *Yunyi Xie*, *Yawei Liu*, *Jinhua Zhang*, *Xinlu Zhang and Zhen Zhao*

205 Can Large Language Models Evaluate Grant Proposal Quality? Revisiting the Wennerås and Wold Peer Review Data
Ulf Sandström and Mike Thelwall

218 Decoding the Impact Dynamics: Prediction and Interpretation of Scientific Research Cited by Policy Documents
Chao Ren, *Menghui Yang*, *Rongchun Xiao and Meijian Shentu*

237 In Which Fields Do ChatGPT Scores Align More Closely with Research Quality than Do Citation Rates?
Mike Thelwall

260 MVAC: A Multimetric Distance-Aware Variational Autoencoder Framework for Personalized Course Recommendation
Hemn Abdalla

274 A Multi-Source Heterogeneous Data Empowerment Method for AI Product Profiling that Integrates Distant Supervision and Large Language Models
Yuan Wang, *Yurong Li*, *Haotan Liu*, *Wei Ma*, *Wenhui Hu and Yong Huang*

292 Changing Topic Bias in Biomedical Science Maps by Linking Documents Through Alternative Data Sources: Policy Documents, Patents, Authors, Facebook, and Twitter
Juan Pablo Bascur, *Rodrigo Costas and Suzan Verberne*
